

## Product Data Sheet

### GCNR-104MB Resistor Free Ground Cord Assembly

The GCNR-104MB consist of a 4 mm female socket securely attached to a 10' (fully extended) insulated curly cord that is terminated with a standard banana plug. This unit may be used with or without the alligator clip that is included with the assembly. The banana plug or the alligator clip (slipped over the banana plug) must be attached to a functional, reliable ground point as determined by the user.

Each cord is individually packaged for secure deployment and is clearly marked with a warning stating the assembly does NOT contain a safety resistor. This assembly is [RoHS 3 Compliant](#) and warranted for one full year from the time of sale.

### **WARNING!**

This ground cord is for use by trained personnel only and is designed for specialty applications such as grounding test equipment. Unlike our other ESD ground cords, this unit **does not** contain a 1 megohm safety resistor.

Approved for Release: SRC, 10/27/2021
