

ULTRATOUGH ESD BENCH TOP MATTING

Mission Critical Work Surface Mat

UltraTough is a tri-layer vinyl featuring a static dissipative top surface bonded to an internal static conductive scrim overlaying a static dissipative surface that contacts the table top or bench.

UltraTough is well suited for robust heavy builds. It is tough, durable, easy to clean and permanently conductive.

Unlike many other ESD table top mats, UltraTough is not dependent on humidity for conductivity.

UltraTough 168 is fully warranted to meet the latest ANSI/ESD S20.20 standards and has successfully passed its table 3, page 6, Product Qualification as tested to ANSI/ESD STM4.1-2017.

- Permanent conductivity
- Robust and easy to keep clean
- Dependable performance that passes stringent ESD audits
- Perfect for mission critical ESD control areas
- Excellent for use with constant monitors (push and cinch style fasteners are recommended).

PHYSICAL PROPERTIES:

Material Composition: Vinyl with silver coated fiber (internal scrim).

Part Number: 168-AS

Thickness: 3/32 of an inch

Colors: Sky Blue or Dark Gray

Availability: Widths; 2 foot, 30 inch, 3 and 4 feet. Lengths; Up to 100 feet. Full rolls and custom cut sizes.

ELECTRICAL PROPERTIES:

PTP per ANSI/ESD STM4.1-2017: $>1.0E06 <1.0E09$

RTG per ANSI/ESD STM4.1-2017: $>1.0E06 <1.0E09$
